

# REPUBLIC OF IRELAND

Rating Analysis - 12/26/18

\*EJR Sen Rating(Curr/Prj) A+/ A+

\*EJR CP Rating: A1

EJR's 3 yr. Default Probability: 1.3%

The schizophrenic nature of much economic commentary and analysis hinted at in the coincidence at present of widespread concerns regarding the risks posed by Brexit on the Irish economy and a notable focus on 'the return off the boom'. The Irish GDP growth has been markedly faster of late than in the early 1990's (red v pink line), largely reflecting the exceptional influence of the activities of a very small number of multinationals. Today's figures show GDP some 69% higher than in 2013, a marked outperformance of relative to the post 1999 trend. A 'No deal' Brexit is likely to dramatically cut Irish economic growth for 2019, something to watch out for. Affirming.

**Economic Growth**

Growth data for the third quarter of 2018 suggest that the Irish economy is continuing to post solid gains in activity although the pace of growth appears to be moderating. Consumer spending increased 1.0% q/q, following a 1.3% rise in the second quarter. This leaves household spending 2.9% above the level of a year earlier, a solid increase but well below the 3.8% annual increase recorded in the second quarter.

However, the economy faces an unprecedented degree of uncertainty in 2019; the outcome of the Brexit process, combined with the possibility of increased international trade tensions, could have significant implications for the economy's performance in the new year.

**Fiscal Policy**

The Irish gov't's Budget 2019 envisages a position of broad balance in the public finances in 2017 and, thereafter, predicts a steady further improvement to the point where on the Department of Finance's figures a significant surplus of 1.4% of GDP is achieved by 2023. These estimates appear to imply a return towards the scale of surplus seen in the pre-crisis years. The exchequer returns for nine-month end-September appear broadly consistent with the official full year target of a General Government deficit of €780M.

	Surplus-to-GDP (%)	Debt-to-GDP (%)	5 Yr. CDS Spreads
Ireland	0.22	68.00	35.39
Germany	1.02	64.10	13.11
France	-2.54	97.00	32.70
Belgium	-0.79	103.10	25.68
Italy	-2.96	131.80	244.70
United Kingd	-0.73	87.70	95.43

Sources: Thomson Reuters and IFS

**Unemployment**

Jobs data for the third quarter of 2018 suggest the Irish economy continues to have strong positive momentum but they hint that the pace of growth may be cooling slightly of late. The annualised quarterly increase at 1.9% in Q3 2018 compares to 2.7% previously, also points to a modest slowdown in the pace of growth of late. Non- Irish nationals now account for 16.2% of employment, fractionally higher than the 16.0% peak seen in early 2008.

	Unemployment (%)	
	2016	2017
Ireland	8.38	6.66
Germany	4.13	3.76
France	10.07	9.43
Belgium	7.86	7.16
Italy	11.68	11.23
United Kingd	4.91	4.40

Source: Intl. Finance Statistics

**Banking Sector**

Macro-prudential policy tools have reduced the share of risky loans in the market. Given the risk of overheating in the property market, the Central Bank of Ireland might impose an extra capital buffer equivalent to 1% of banks' risk-weighted assets from July 2019, and additional buffers should be added swiftly if needed. While problem loans are still among the highest in Europe, they have fallen sharply since the crisis and will continue to do so under pressure from European Central Bank rules.

Bank Assets (billions of local currency)		
	Assets	Mkt Cap/ Assets %
ALLIED IRISH BK	107.46	40.92
BANK IRELAND	129.80	9.50
<b>Total</b>	<b>237.3</b>	
EJR's est. of cap shortfall at 10% of assets less market cap		-32.6
Ireland's GDP		294.1

**Funding Costs**

Private sector debt as a proportion of GDP fell by 1.1% in Q2 2018. Private sector debt as a proportion of GDP is at its lowest level since Q4 2007 - due to both rising GDP and falling levels of household debt, which was partially offset by increasing NFC debt during the quarter. Non-Financial Corporations' debt as a percentage of GDP remained unchanged during Q2 2018, as GDP and NFC debt both expanded at a similar pace.

**Ease of Doing Business**

Major factors for growing the economy are the ease of doing business and the economic freedom; although not the sole factor for determining economic growth, a country which makes it easy for businesses to operate and provides a reasonably free environment to conduct business has a good chance for growth. The chart on the right indicates that with an overall rank of 17 (1 is best, 189 worst) is strong.

The World Bank's Doing Business Survey*			
	2018	2017	Change in

**Credit Quality Driver: Taxes Growth:**

REPUBLIC OF IRELAND has grown its taxes of 5.3% per annum in the last fiscal year which is more than the average for its peers. We expect tax revenues will grow approximately 5.3% per annum over the next couple of years and 4.8% per annum for the next couple of years thereafter.

**Credit Quality Driver: Total Revenue Growth:**

REPUBLIC OF IRELAND's total revenue growth has been less than its peers and we assumed no growth in total revenue over the next two years.

Egan-Jones ratings are subject to disclaimers. **Egan-Jones is not an NRSRO (as defined by the SEC) for sovereign/municipal issuers and structured finance/ABS issuers.**

**Comments on the Difference between the Model and Assigned Rating**

In this case, there has been little change in the recent results and therefore we have used our best judgement in making adjustments which are reflected in the results for the projected ratings. We have assigned a rating of "A+" whereas the ratio-implied rating for the most recent period is "AA-"; we expect results to decline slightly.

**Changes in Indicative Ratios**

We have not made any adjustment in the indicative ratios at this time.

**SEC Rule 17g-7(a) Disclosure**

Below are the disclosures as required by Paragraph (a) of Rule 17g-7.

**1. The symbol in the rating scale used to denote the credit rating categories and notches within categories and the identity of the obligor, security, or money market instrument as required by Paragraph (a)(1)(ii)(A) of Rule 17g-7:**

For the issuer REPUBLIC OF IRELAND with the ticker of 1266Z ID we have assigned the senior unsecured rating of A+. There are three notches in our rating categories (e.g., A-, A, and A+) other than those deep into speculative grade; for CC, C, and D there are no notches.

**2. The version of the procedure or methodology used to determine the credit rating as required by Paragraph (a)(1)(ii)(B) of Rule 17g-7:**

We are using the methodology available in our Form NRSRO Exhibit #2 dated Nov 5, 2018 available via [egan-jones.com](http://egan-jones.com) under the tab at the bottom of the page "Methodologies".

**3. The main assumptions and principles used in constructing the procedures and methodologies used to determine the credit rating as required by Paragraph (a)(1)(ii)(C) of Rule 17g-7:**

The credit rating assigned reflects our judgement regarding the future credit quality of the issuer. Regarding the specific assumptions used, please refer to page 3 of this Rating Analysis Report.

**4. The potential limitations of the credit rating as required by Paragraph (a)(1)(ii)(D) of Rule 17g-7:**

Our rating pertains solely to our view of current and prospective credit quality. Our rating does not address pricing, liquidity, or other risks associated with holding investments in the issuer.

**5. Information on the uncertainty of the credit rating as required by Paragraph (a)(1)(ii)(E) of Rule 17g-7:**

Our rating is dependant on numerous factors including the reliability, accuracy, and quality of the data relied upon in determining the credit rating. The data is sourced from publicly-available 10Q and 10K statements, quarterly reports, 8K filings, earnings reports, and other similar sources. In some cases, the information is limited because of issues such as short operating histories, the lack of reported data, a delay in reporting data, restatements, inaccurate accounting, and other issues. Such shortcomings are not always readily apparent. EJR aims to identify such shortcomings and make adjustments using its best judgement.

**6. Whether and to what extent third-party due diligence services have been used in taking the rating action as required by Paragraph (a)(1)(ii)(F) of Rule 17g-7:**

EJR does not utilize third-party due diligence services.

**7. How servicer or remittance reports were used, and with what frequency, to conduct surveillance of the credit rating as required by Paragraph (a)(1)(ii)(G) of Rule 17g-7:**

Servicer or remittance reports normally pertain to structured finance issuers; this report does not pertain to a structured finance issuer (EJR is not an NRSRO for structured finance or sovereigns/ municipal issuers). Regarding surveillance, the minimum time period for corporation issuers is normally one year.

**8. A description of the data that were relied upon for the purpose of determining the credit rating as required by Paragraph (a)(1)(ii)(H) of Rule 17g-7:**

EJR uses 10Q and 10K statements, quarterly reports, 8K filings, earnings reports, and other similar sources for ratings on publicly-traded issuers. In the case of private issuers, EJR relies on information provided mainly by issuers.

**9. A statement containing an overall assessment of the quality of information available and considered in the credit rating as required by Paragraph (a)(1)(ii)(I) of Rule 17g-7: The information is generally high quality and readily avail.**

**10. Information relating to conflicts of interest as required by Paragraph (a)(1)(ii)(J) of Rule 17g-7:**

This rating is unsolicited.

**11. An explanation or measure of the potential volatility of the credit rating as required by Paragraph (a)(1)(ii)(K) of Rule 17g-7:**

Our rating aims to assess the probability of the payment of obligations in full and on-time. Factors which affect such probability, and in turn our rating, include changes in the operating performance of the issuer, changes in capital structure, and merger and acquisition events.

**12. Information on the content of the credit rating as required by Paragraph (a)(1)(ii)(L) of Rule 17g-7:**

Regarding the historical performance of the credit rating, our rating transition matrix is available in our Form NRSRO, exhibit 1. The expected probability of default and the expected loss in the event of default is listed on the first page of this report.

**13. Information on the sensitivity of the credit rating to assumptions as required by Paragraph (a)(1)(ii)(M) of Rule 17g-7:**

Below is a summary of the impact of the 5 assumptions which independently would have the greatest impact on our "ratio-implied rating":

	Assumptions			Resulting Ratio-Implied Rating		
	Base	Optimistic	Pessimistic	Base	Optimistic	Pessimistic
Taxes Growth%	5.3	9.3	1.3	A+	A+	A+
Social Contributions Growth %	5.0	8.0	2.0	A+	A+	A+
Other Revenue Growth %		3.0	(3.0)	A+	A+	A+
Total Revenue Growth%	3.9	5.9	1.9	A+	A+	A+
Monetary Gold and SDR's Growth %	5.0	7.0	3.0	A+	A+	A+

**14. If the credit rating is assigned to an asset-backed security, a description of: (i) the representations, warranties, and enforcement mechanisms available to investors; and (ii) how they differ from the representations, warranties, and enforcement mechanisms in issuances of similar securities, as required by Paragraph (a)(1)(ii)(N) of Rule 17g-7:**

This credit rating is not assigned to an asset-backed security.

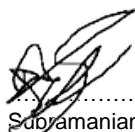

**ATTESTATION FORM**

In compliance with the US Securities and Exchange Commission (SEC) Rule 17g-7(a), the Egan-Jones analyst who published the report is responsible for the rating action and to the best knowledge of the person:

- 1) No part of the credit rating was influenced by any other business activities,
- 2) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated, and
- 3) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

## **Sovereign Rating Methodology (Non-NRSRO)**

**Scope and Limitations: Sovereign Issuer Credit Quality Ratings (CQR) are a forward-looking assessment of a sovereign's capacity and willingness to honor its existing and future obligations in full and on time. Sovereigns are assigned two CQRs: a Local-Currency CQR, which reflects the likelihood of default on debt issued and payable in the currency of the sovereign, and a Foreign-Currency CQR, which is an assessment of the credit risk associated with debt issued and payable in foreign currencies.**

**Key Rating Drivers: EJR's approach to sovereign risk analysis is a synthesis of quantitative and qualitative judgments. The quantitative factors EJR uses are:**

- Debt in relation to GDP.
- Surplus or deficit in relation to GDP.
- Debt plus potential under-funding of major banks in relation to GDP.
- Interest expense in relation to taxes.
- GDP growth.
- Foreign reserves in relation to debt.

Debt levels for many sovereign issuers have increased at an accelerating rate over the past decade, affecting implied ratings. EJR also considers unemployment levels and funding costs. EJR recognizes that no model can fully capture all the relevant influences on sovereign creditworthiness, meaning that the its sovereign ratings can and do differ from those implied by the rating model. Some of the qualitative factors that impact its ultimate assessment of credit quality include the flexibility, stability and overall strength of the economy, efficiency of tax collection, acceptance of contract law, ease of doing business, trade balances, prospects for future growth and health and monetary policy, and economic freedom. These subjective and dynamic qualitative issues are not captured by the model but affect sovereign ratings
